## Work Experience

### Prime Systems

2016 – Current

Mobile Developer

I am responsible for the evolution and maintenance of mobile applications developed by the company. I work with Android, Swift and C# (Universal Windows Applications) development. I rewrote our biggest application for the Swift and C# platforms. I also have experience working with version control tools like Github and Phabricator.

### BHS – Belo Horizonte Sistemas

2013 – 2014

Software Developer

I was part of a startup that created a website that the primary purpose was to incentivize people to recycle their trash. The project was developed using ASP.NET, MVC, SQL Server, HTML, Javascript and CSS. During the project's development process, BHS offered me an internship to work with C#, ASP.NET and SQL Server. At BHS, I was part of the team that was responsible for building the resume bank that the company. The goal was to develop a solution to facilitate the company's talent acquisition.
